

Custom Rates Effective December 1st, 2017

All rates are a basis for a particular job. Rates may fluctuate due to size and/or number of fields, timing of operation or significant changes in variable expenses (ie: fuels expense). All rates quoted include machine, fuel, and labor unless noted. Timing is always based on first come, first served and 40 acre minimums. Quotes are cash price. Invoices will include 5.0% cash and/or prepay discounts applied if paid within 5 days of invoices. New invoices will be issued after initial 5 day period excluding the cash pay discount meaning rates are 5% higher if not paid on cash basis. Other settlement arrangements can certainly be made with prior arrangements, no problem. Rates may change without notice, but ALL pending agreements will be honored.
