

Kip Cullers Nutrient Compass Foliar Fertilizer for Soybeans in 2015

Charles W. Herbster

Owner of Conklin Company and Herbster Angus Farms

“As a registered Angus seed stock producer and farmer, and the owner of Conklin Company®, Inc., I understand the value of products that perform. We are proud of the Conklin AgroVantage System® and the impact it has made in agriculture. Conklin is honored to partner with Kip Cullers and bring his expertise to the U.S. market with Kip Cullers’ Nutrient Compass Foliar Fertilizer™. It is important to test and evaluate all Conklin products before they are brought to the market. The following soybean data paves the way for future product recommendations.”

- Charles W. Herbster

Charles W. Herbster and Kip Cullers

“We have seen many interesting results using the Kip Cullers Nutrient Compass the last 2 years. Some of the remarkable results we have seen in soybeans are coming from greater leaf size, more blossoms, and resulting in increased pods, sometimes up to double the pods on a single plant.” - Mark F., MN

Kirk D., Nebraska **6 bushel increase**
Darren M., North Dakota **5 bushel increase**

David M., Illinois **4 bushel increase**
Kevin H., Ohio **12 bushel increase**

We are evaluating Kip Cullers Nutrient Compass Foliar fertilizer with over 500 growers across the country.

Farmers across the country reported the following with using 1-2 quarts per acre with their herbicide or foliar feeding program at the V3 to V5 stage or one week prior to bloom.

- **More flowers leading to more pods per plant**
- **Greater root mass, healthier plants**
- **Enhanced photosynthesis resulting in darker green plants**
- **Larger leaves**
- **Greater yields**
